PROJECTS

blog

- Created a blog platform enabling users to join with an email address, facilitating seamless posting and interaction with others' content. Users can upload images to enhance their posts and utilize a rating system for feedback. Moderators can ban users or posts, ensuring a safe and conducive environment for all.
- Technologies used: Node.js, Express, MongoDB, EJS.
- GitHub Repository: https://github.com/MohsenHassanHegazy/blog
- Live Demo: https://blog-3664.onrender.com/posts

supermarket abi

- Designed and implemented a supermarket management system to handle sales and inventory management.
- GitHub Repository: https://github.com/MohsenHassanHegazy/supermarket

portfolio

- personal page used to easily show my skills and work
- live page: https://mohsenhassanhegazy.github.io/

online shop

- Discover a dynamic online marketplace where users effortlessly buy and sell their products. Seamlessly transact using our innovative payment system powered by Stripes, ensuring secure and convenient transactions for all
- GitHub Repository: https://github.com/MohsenHassanHegazy/shop

STRENGTHS

Hard-working   good with teamwork   fast learner   work under pressure   problem solv

SKILLS
